Leading Technology in Magnetic Resonance Imaging

Why 3.0 Tesla Magnet Technology?

3T Magnetic Resonance Imaging (3T MRI) is the most powerful and intense type of magnetic resonance imaging technology available.

- State–of–the–art Technology
- High Strength Magnet
- Twice the strength of a 1.5T magnet
- Better contrast between flowing blood and surrounding tissue
- Superior imaging resolution
- Exquisite detail in ultra–thin 3-D slices
- Increased signal clarity and maximized intensity for cleaner, crisper images
- Decreased need for Anthrographic studies of the wrist, shoulder, and hip
- Increased patient comfort
- Wider and shorter size magnet bore
- Decreased claustrophobia
- Reduced patient anxiety & faster scan
- Most exams can be performed with head OR feet outside of magnet bore
- Helps decrease risk of patient motion

Testimonials

Thank you Boulder MRI for having the ability to schedule an appointment for the same day as I called in!

The MRI Technologists are kind, reassuring, and understanding of patient needs.

Patient coordinators at the front desk are amazing! So helpful with scheduling, dealing with insurance issues, and friendly with checking in patients.

Boulder MRI’s staff is extremely friendly and courteous. I would highly recommend this customer service!
